

### A.11 Solomon Islands

In 2010–2014, a total of **US\$42.4 million** in grant (or grant-equivalent) finance was allocated to Solomon Islands for activities that principally targeted climate change objectives. An additional US\$111 million in ODA that targeted other objectives was reported as having co-benefits for climate change objectives (i.e. climate change was tagged as a “significant” policy objective).

Of the US\$42.4 million specifically targeting climate change objectives, 35.9% (US\$15.2 million) supported mitigation activities, 62.3% (US\$26.4 million) was for adaptation, and 1.8% (US\$0.8 million) targeted both objectives simultaneously.

The largest single sources of climate finance for Solomon Islands were the Global Environment Facility (GEF), including both the Trust Fund and the Least Developed Countries Fund, followed by Japan and the Adaptation Fund. Finance has targeted a diversity of sectors, with the largest contributions to disaster prevention and preparedness, forestry policy, water policy and food aid/food security programmes. The country has also received general budget support from the European Union.

**Figure A11: Sources of finance, sectoral distribution and policy objectives, Solomon Islands (million US\$)**

Source: OECD DAC Creditor Reporting System, contributions tagged against the Rio Marker where climate change was the primary objective.

In addition, data on multilateral climate fund activities show that between January 2015 and September 2016, Solomon Islands was allocated US\$6.70 million for solar power development from the Scaling Up Renewable Energy Program for Low Income Countries (SREP).

Table A11 lists individual climate finance contributions to Solomon Islands in 2010–2014; the title of the project/intervention is as listed in the CRS database.

**Table A11: Climate finance commitments to Solomon Islands, 2010–2014 (million US\$)**

Source	Project/intervention title	Sector	Amount
<b>Adaptation Fund</b>	Enhancing resilience of communities	Food aid/food security programmes	5.53
<b>Australia</b>	Pacific Islands Climate Prediction Phase 2	Environmental policy	0.03
<b>Australia</b>	Secretariat of the Pacific Community Climate Change Activities	Environmental policy	0.09
